

Abstract

Tóm tắt báo cáo

Table of Contents

List of Abbreviations

List of Figures

List of Tables

(for any extracted part which is from the other sources and AI's supports, citations are required from Chapter 1 to the end of the report)

Chapter 1 – Introduction

1.1. Motivations

(why)

1.2. Objectives

(what)

1.3. Scope

1.4. Significance of the Project

1.4.1. Significance from the Practical Perspectives

1.4.2. Significance from the Scientific Perspectives

1.5. Report Structure

Chapter 2 – Background Knowledge and Technologies

2.1. ...

2.2. ...

2.3. Summary

(summarize what has been presented and confirm if they can cover all the background knowledge and technologies required and intended for your project)

Chapter 3 – Related Work

3.1. ...

(Existing Similar/Related Works from reviewed papers/articles)

3.2. ...

(Existing Similar/Related Works from software/tools/systems)

3.3. Summary

(Identify and analyze the gaps from the related works and position the work you are working on)

Chapter 4 – The Proposed System

4.1. Business Context

(Application domain and its business processes along with business rules)

(Business organization descriptions including policies, especially those with legal and ethical issues)

4.2. System Description

4.2.1. System Overview

(An overall view about the proposed system, its purposes and users/user groups)

4.2.2. Research Problems

(Research problems)

4.2.3. Challenges and Difficulties

(Challenges and difficulties)

4.3. User's Requirements

(Requirement analysis is also included for each group)

4.3.1. Functional Requirements

4.3.2. Non-functional Requirements

4.3.3. Data Requirements

4.4. Summary

Chapter 5 – Analysis and Design

5.1. Analysis

5.1.1. Business Process Modeling

(activity diagrams or anything else you prefer)

5.1.2. Use Case Modeling

(use case diagrams and tabular description of each key use case)

5.2. Technology Solution

(Technology stack)

5.2.1. Frontend

5.2.2. Backend

5.2.3. AI algorithms/technologies/models/...

(each technology solution is selected according to some criteria after compared with the others)

5.3. Design

5.3.1. System Architecture

(general with component diagram and the one with the selected technologies)

5.3.2. Sitemap Design

5.3.3. Sequence Diagrams

5.3.4. Class Diagrams

5.3.5. Database Design

5.3.6. AI Model Design

5.3.7. API Design

5.3.8. UI/UX Design

5.3.9. Test Case Design

5.3.10. Policies for the Processing of the Proposed System and Third-parties

5.4. Summary

Chapter 6 – Implementation and Testing

6.1. Implementation

6.2. Testing

6.3. Summary

Chapter 7 – System Evaluation

7.1. ...

(Frontend-related evaluation)

7.2. ...

(Backend-related evaluation)

7.3. ...

(AI-related evaluation)

7.4. Summary

Chapter 8 – Conclusion

8.1. Achievements

(what has been done and achieved)

8.2. Future Works

(all limitations of your current work are described here and then linked to your future works. For the first phase, they are included in the plan for the next phase.)

Plan for Capstone Project

(make a plan for a 15-week capstone project)

References

(use any well-known format from IEEE, ACM, Springer Verlag, etc.)

Appendix 1 - ...

Appendix 2 - ...

(pay attention to the number of pages to properly prepare for appendices)
